Report: Tree planting is the process in which tree seedlings are transplanted generally for forestry, land reclamation, or landscaping purposes. Tree plantation is very necessary because trees provide oxygen to the environment and make the air quality better. If more trees are planted, then the world's environment will become a safer place to live in. Tree plantation also reduces pollution, thus making the life of future generations secure. Our students participated in tree plantation activity organized by "Abhinav Education Society's College of Pharmacy." In which students asked to plant a one plant in their respective garden and send a photos of same.

Report:

Abhinav Education Society's College of Pharmacy, Narhe students has prepared Herbal Hand Sanitizer During Covid 19 (Pandemic) for public use, health & safety. : The main aim for the preparation of a herbal hand sanitizer is for "hand hygiene". It is a vital principle in the prevention, control, and reduction of any acquired infection. Mainly hand sanitizer can stop the chain of transmission of micro organisms and other bacteria from hand to different parts of our body.
