International Yoga Day

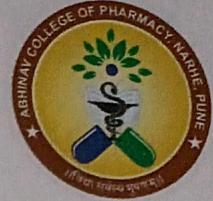

Title of Program	"International Yoga Day"
Objective of Program	Creating awareness about physical health
Day and Date	21/06/2023
Time	10:00 a.m.
Speaker/Guest	Prof. Hemant Washimkar
No. of Participants	50
Convener	Dr. Trupti Tuse
Coordinator/Program Committee	Mrs. Sonali Wagh, Mrs. Shivani Lone

Photos

Abhinav Education Society's
College of Pharmacy (B. Pharm), Narhe, Pune-41.

Detail Report:

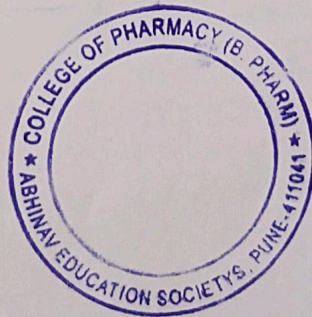

It was co-ordinated by Prof. H. M. Washimkar Sir and Asst Prof. Prachi Karwa Madam. Yoga improves strength, balance and flexibility. Doing yoga every day helps relieve stress to some extent and maintains mental health. With this mindset our aim was to inculcate the need and importance of yoga in our students. Prof. H. M. Washimkar Sir performed "Surya namaskar" step by step and other different basic yoga "Asanas" and told us important health benefits for the same. All our students and faculty members were also participated and performed all the asanas. All the exercises were good and beneficial for our students. All students were excited and energetic. We celebrated this international yoga day to convey the message of keeping mind and body fit through the asanas. 50 students and all our teaching and non-teaching faculty members attended the session.

PHARMACIST STRENGTHENING HEALTH SYSTEM

Your Health, Our Priority: A Pharmacist Promise

Pharmacist is very crucial in healthcare system in ensuring accessible efficient and high-quality healthcare services worldwide. This gives information about the multifaceted contribution of pharmacists in healthcare system. Their role in pharmacy is dispensing and promoting patient safety and medication optimization. They are also involved in various healthcare programs such as counseling, chronic diseases, invention, quality assurance, quality control, production, marketing, research and development, etc. As the system continues to evolve, pharmacist's role will expand in upcoming days and will adapt to meet changing demands of patients at communities.

CLINICAL PHARMACY

COMMUNITY PHARMACY

ASK YOUR PHARMACIST

Patient Counseling

1. Name of the medicine
2. How to take the medicine
3. Goals of the therapy
4. Storage of the medicine
5. Drug interaction
6. Adverse drug reactions.

HOSPITAL PHARMACY

Hospital Pharmacist

- Pharmaceutical Management
- Patient Screening & Training
- Drug Information Service
- Pharmaceutical Care
- Extemporaneous Preparation
- Promotion of Preventive Measures
- Tele health Pharmacy Service
- Psychological Counselling

FUTURE & INNOVATION

- Pharmacy Automation expected to build upto 2030.
- Recent Evidence also suggest that, addition of pharmacist in a collaborative team based setting can improve National Health Care.
- Health Care Bots that can perform basic services.
- Smartphones act as point of care and home health diagnostic tool for conditions such as urinary tract infections or diabetic eye disease.
- Companies are using the gut microbiome to create a food-as-medicine approach to manage glucose levels and improve overall health.

Pharmacy is a complete profession: Pharmacists reflect every sector of society in the form of:

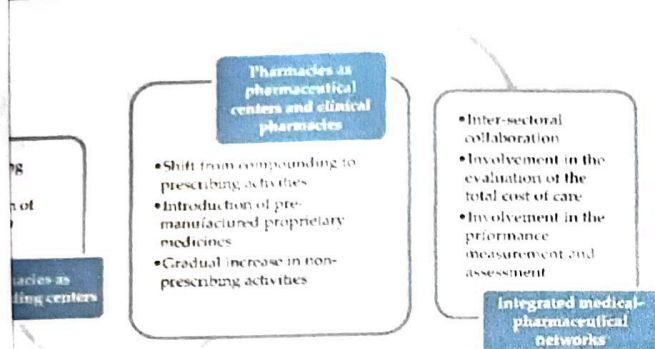

- DESIGNER: Designing a dosage form.
- LEGAL: Having a fair knowledge of laws and legislation about the drug.
- TECHNICIAN: Having a sound technical knowledge.
- MANAGER: Knowledge about management, accounting, marketing counseling.
- HEALTH PROFESSIONAL: Knowledge regarding health.

Conclusion: Pharmacists are the unsung heroes in our healthcare system, working diligently to strengthen it through their dedication, expertise, and patient-centered care. Their contributions ensure safer medication

PHARMACY STRENGTHENING HEALTH SYSTEM

In ancient time, Ayurvedic system of medicines was predominant and pharmacy profession was not in existence. Later on British brought their Allopathic medicines. In those days pharmacy education was started in India. This globalization affected the separation of pharmacy and medicine.

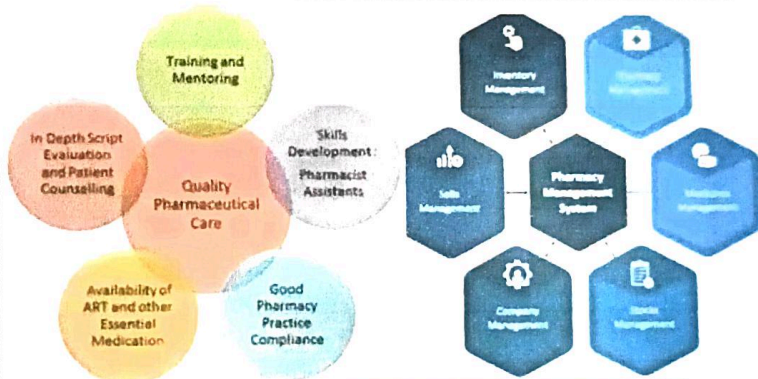

Role of community Pharmacist

Community Pharmacist work at front line healthcare in cities, town & villages. They work from their own pharmacies or out of local health care centres & doctor's surgeries.

Pharmacist in COVID 19 pandemic

Pharmacist played positive role in the supply of non-routinely drugs such as TCM, preventive medicines, providing drug information consultation & identifying drug reaction and interaction during the COVID 19 epidemic prevention and control.

Role of Industrial pharmacist

Research and development.
Manufacture & quality assurance.

CONCLUSION

Pharmacist represents the 3rd largest healthcare professional group in world and in India. Today there are around 8 lakh pharmacist working in various positions applying their unique knowledge and skills contributing to the health of the nation.

Role of Hospital Pharmacist

Hospital Pharmacist are experts in medicines who works as part of multidisciplinary health care team to manage the use of medicines in hospitals.

A new era of pharmacovigilance Future challenges & opportunities

Pharmacovigilance
 Pharmakon- Drug
 Vigilare- To keep watch

Abstract-

Pharmacovigilance (PV) is very significant and inevitable part of drug discovery and development, which requires comprehensive documentation process and severe monitoring at every phase of drug development including risk management and pre & post-authorization safety studies.

Keywords: Pharmacovigilance, Challenges, Opportunities

Pharmacovigilance: science and activities relating to the

- Detection
- Assessment
- Understanding
- Prevention of adverse drug reactions or any drug related problems

Pharmacovigilance in India

- 1986 ADR monitoring system for india
- 1997 India joined WHO-ADR monitoring programme
- 2004-2008 National PV program overseen by CDSCO
- 2010 Pharmacovigilance programme of india (PVPI)

Potential sources of Errors in Pharmaceutical Care

- Handwriting of prescriptions
- Level of Stress on workplace
- Unclear records in information system
- Bad system of stock alignment/organization
- Disruptions in information availability and flow

Challenges

- More than 6000 licensed drug manufacturers
- Over 60,000 branded formulations
- Large population, predominantly in rural area
- Poor spontaneous reporting
- Lack of physician and patient awareness
- inadequate management system
- The globalization of the pharmaceutical industry means that pharmacovigilance needs to be carried out across multiple jurisdictions, each with its own regulations and reporting requirements.
- The regulatory landscape
 Pharmacovigilance for is continually evolving, and keeping up with the changes can be challenging.

Lethary

Ignorance

Indifference

Diffidence

Complacency

7 DEADLY
 SIGN'S FOR
 UNDER-
 REPORTING OF
 ADR

What is BEST for
 FUTURE ??

- ❖ Training Programs - Healthcare professional, Medical Students, pharmacy graduates, workers in rural areas
- ❖ The post-marketing medicine evaluation process will make it easier to define the safety profile of any drug in a practical setting.
- ❖ Industry(domestic and MNC) active participation in drug safety monitoring during Clinical Trials and Post Marketing Surveillance

Opportunities

- Artificial intelligence (AI) can help in pharmacovigilance by analyzing large amounts of data quickly and accurately, detecting trends and patterns, and identifying potential safety issues.
- Engaging patients in pharmacovigilance can improve adverse event reporting and increase patient safety.
- Digital health technologies such as wearable devices, mobile apps, and telemedicine can help with pharmacovigilance by monitoring patients in real-time and detecting adverse events early.
- The use of real-world data (RWD) can provide valuable insights into drug safety and effectiveness in real-world settings.

Conclusions- PV helps to the patients get well and

A NEW ERA OF PHARMACOVIGILANCE : FUTURE CHALLENGES AND OPPORTUNITY

ABSTRACT

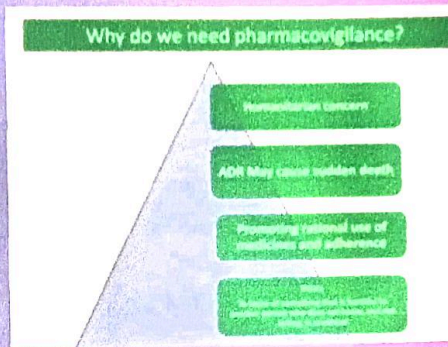

Pharmacovigilance has been described as "the science and activities relating to the detection, assessment, understanding and prevention of the adverse effects of drugs or any other possible drug-related problems. Future PV will require dedicated sub-functions with the sole responsibility of direct engagement with patients and patient groups through their preferred communication channels to collate questions and concerns and to more effectively translate safety-related information to the layperson.

INTRODUCTION

- The role of ecopharmacovigilance is becoming more and more important to control and minimize the sources of pharmaceutical pollution through the detection, assessment and prevention of adverse effects related to the presence of pharmaceuticals in the environment.
- Why was pharmacovigilance introduced? Pharmacovigilance started about 170 years ago, although it was not yet named as such at that time. It is a structured activity in the professional health field, with important social and commercial implications aimed at monitoring the risk/benefit ratio of drugs, improving patient's safety and quality of life.

AIM

- Improve patient care and safety in relation to the use of medicines and all medical and paramedical intervention.
- Improve public health and safety in relation to the use of medicines.

INTRODUCTION

Pharmacovigilance is also referred to as drug safety. It includes science and activities related to the identification, evaluation, understanding, and prevention of adverse effects and other drug-related problems and are established by the WHO. Drugs are intended to cure, prevent or treat diseases, but some risks can cause serious harm to patients, especially adverse drug reactions. PV focuses heavily on adverse drug reactions or ADRs that are defined as any reaction to a drug that is harmful and unintended, including inefficiency. Medication errors such as overdose and misuse as well as drug exposure during pregnancy and breastfeeding are often of concern, even without an adverse event, as they can result in an ADR. PV's role is to assess which adverse effects cross the efficacy line of a drug. Some activities involves are: Case-control, Prospective study, Population statistics, Intensive event report, the spontaneous report in the case is the population of the single case report.

"The goal is to bring prevention and early intervention to the developing world."

Challenges

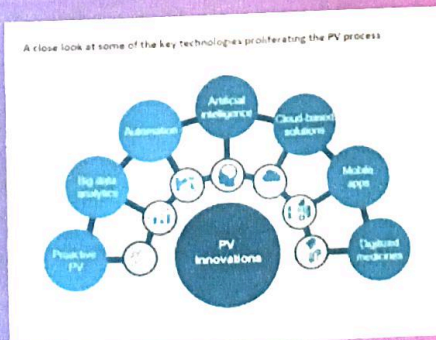

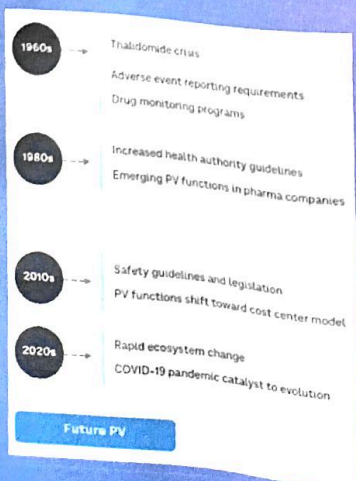

- Legal backing- Cap 244 Pharmacy Law outdated 1957
- Personnel
- Dedicated confirmed financial support- routine
- Advocacy and awareness- within healthcare fraternity, media + gov
- Encouraging reporting- no punitive action on reports
- Strengthening Pharmaceutical & GMP inspectors and the link with Pharmacovigilance

Benefits of Pharmacovigilance

- ✓ Prevention of drug-related morbidity
- ✓ Prevention of drug-related mortality
- ✓ Minimize in-patient and out-patient morbidity
- ✓ Huge savings in healthcare costs
- ✓ Better patient compliance
- ✓ Greater understanding of drug-induced disorders
- ✓ Early signals / warnings to potentially serious ADRs
- ✓ Greater awareness of agents that commonly cause drug-induced disorders
- ✓ Better patient care
- ✓ Greater importance of Role of the Healthcare Worker

WHAT IS THE FUTURE OF PHARMACOVIGILANCE IN INDIA?

The future of pharmacovigilance in India is likely to see continued growth and development. The Indian government has made significant efforts in recent years to strengthen the country's pharmacovigilance system and regulations.

CONCLUSION

- Pharmacovigilance is essentially based on the qualitative and quantitative study of spontaneous adverse drug reactions reports, followed by a clinical assessment/judgment with regards to its impact on the overall safety profile of the drug.

Detail Report:

Abhinav Education Society's
College of Pharmacy (B. Pharm), Narhe, Pune-41.

Abhinav Education Society's College of Pharmacy, organized a lecture on the topic "Gender Sensitization", on 13th September 2023. This lecture was delivered by Mrs. Vaishali Chavan. She explained that, in today's generation, both spouses are working, so even household chores is responsibility of both, also about changing society and need to change the mindset regarding gender differences and stereotypes. What is actually meant by gender equality and how it should be implemented? She highlighted the phrase "The change starts with us, then society will change". She also discussed some examples of gender biases, their consequences and tried to provide the practical solutions. The session was attended by 80 students. The session was co-ordinated by Mrs. Sonali Wagh, Mrs. Shivani Lone and Mrs. Anagha Bhujbal.

Detail Report:

Abhinav Education Society's College of Pharmacy (B. Pharm) together with Maharashtra State Chemists and Druggists Association organized a rally on occasion of World Pharmacist Day. Chief guests for programme were Mr. Vidyadhar Javdekar (Retd. Joint Commissioner, FDA), Mr. Ramchandra Gaikwad (Member, Chemist and Druggist Association), Mr. Rajiv Jagtap (Founder, Abhinav Education Society), Mr. Dhruva Jagtap (Treasurer, Abhinav Education Society), Mr. Sanjay Shah (President, M.S.C.D.A, West zone), Mrs. Nitatai Dangat (Corporator), Mr. Ajit Borade (President, S.N.A.C), Mr. Sachin Katore (Member, C.A.P.D), Mr. Sandeep Parekh (President, C.A.P.D). The program began with formal introduction by Prof. Sonali Wagh at Muktai Garden Hall, Dhayari, Pune. The session was followed by rally from the hall till backgate of Smt. Kashibai Navale Hospital, Narhe. Street plays were performed to create awareness amongst common people in society related to pharmacy profession, common ailments and prevention. During rally, Pharmacists in medical stores were felicitated and honored under the campaign "Honour our Pharmacists". On this day, a resolution was taken by our society to provide medicines to old and economically weak people. All the teaching staff along with Principal, Dr. Trupti Tuse were present for the program. We had a great response of almost 180-200 enthusiastic students. The overall program was a great success.

Detail Report:

Abhinav Education Society's College of Pharmacy celebrated "Constitution Day" on 27th November 2023. Constitution Day also known as "Savidhan Divas" is celebrated in our country every year to commemorate the adoption of the constitution of india. The importance of constitution is to outline the role and rights of citizens as well as defining the structure and powers of the government. Creating a path for the future citizens to build a corruption free society. We paid tribute to our constitution by reading the constitution with students. Some of the student representatives from B. Pharm and Pharm D were participated in reading the constitution. An important part of the celebration was the reading of the Preamble to the Constitution and reaffirming our commitment to uphold its ideology.
